PETER J. DWYER, DIRECTOR

RESIDENTS IN WISCONSIN
JUVENILE CORRECTIONAL INSTITUTIONS
on December 31, 1987

- Five hundred-forty youths, 503 boys and 37 girls, were in residence at Ethan Allen and Lincoln Hills Schools on December 31, 1987. Eight out of 10 (80.6 percent) were classified as new commitments, less than one-fifth (16.1 percent) as returns following revocation of aftercare supervision, three percent had been institutionalized pending the outcome of their aftercare supervision revocation hearing, and the remaining (two boys) were being supervised for jurisdictions other than Wisconsin. (See Table 1)

- Over one-half (55.5 percent) of the boys and slightly over three-fifths (62.1 percent) of the girls in residence on December 31, 1987, were from non-white racial and/or ethnic backgrounds. (See Table 2)

- Under one-half (48.9 percent) of the boys and just over one-half (51.2 percent) of the girls in residence on December 31, 1987, were committed to the institutions from Milwaukee County. Slightly more than one-fifth (22.5 percent) of the boys were committed by Racine (40 cases), Dane (28 cases), Kenosha (19 cases), Marathon (14 cases), and Rock (12 cases) counties. (See Table 3)

- Boys were most often committed for unarmed burglary (19.7 percent), theft (13.5 percent), auto theft (13.1 percent), and battery (12.3 percent); while girls were most often committed for theft (18.9 percent), battery (18.9 percent), auto theft (18.9 percent), and resisting arrest (10.8 percent). Boys at Lincoln Hills were more often involved in unarmed burglary (27.8 percent) and property offenses than at Ethan Allen School where offenses against persons such as robbery (13.9 percent) and battery (12.7 percent) were more common. (See Table 4)

- Just over three-fifths (61.5 percent) of the boys and seven out of 10 girls (70.2 percent) were found to have problems with assaultiveness either alone or in combination with other types of problem behaviors. Difficulties with the use of alcohol and/or other drugs either singly or along with problems relating to assaultiveness and/or sexual behaviors was noted for just under two-fifths (38.4 percent) of the boys and about two-thirds (67.5 percent) of the girls. These percentages were derived by totaling all categories in which assaultiveness was included. (See Table 5)

- The average (mean) age for both boys and girls was found to be 16.1 years. Boys at Lincoln Hills, with an average (mean) age of 15.9 years, were somewhat younger than those at Ethan Allen, where the average (mean) age was 16.3 years. (See Table 6)

- About one-third (35.8 percent) of the boys as contrasted with slightly more than three-fifths (62.2 percent) of the girls were found to have developmental and/or emotional difficulties. Problems of this type were more often reported for boys at Lincoln Hills (54.5 percent) than at Ethan Allen School (24.7 percent). (See Table 7)

- Three out of 10 boys (30.4 percent) and girls (32.4 percent) had completed the eighth grade while over one-fourth (28.6 percent) of the boys and one-third (32.4 percent) of the girls had finished the ninth grade. (See Table 8)

- More than one-third (36.9 percent) of the boys and just under one-half (48.9 percent) of the girls were tested at or less than the eighth grade level. (See Table 9)

- Approximately one-half of the boys (49.3 percent) and girls (45.9 percent) were found to be at or above normal intelligence levels. Three out of 10 (30.6 percent) of the boys at Ethan Allen as contrasted with eight out of 10 (80.7 percent) of those at Lincoln Hills were found to be at normal or above normal intelligence levels. (See Table 10)

- Juveniles were institutionalized for an average (mean) of 5.8 months since their most recent admission. Boys had an average (mean) stay of 5.9 months contrasted with girls for whom the average (mean) stay was 4.8 months. Boys at Ethan Allen School had been institutionalized for an average (mean) of 5.8 months; those at Lincoln Hills for an average (mean) of 6.2 months. (See Table 11)

PETER J. DWYER, DIRECTOR

Juveniles Admitted to
Division of Corrections
Calendar Year 1987

- Eight hundred sixteen youths, (747 boys and 69 girls) were admitted to Wisconsin's correctional institutions for juvenile offenders during calendar year 1987. Seven-tenths (70.7 percent) were classified as new commitments, one-fifth (21.7 percent) as returns following revocation of aftercare field supervision. Less than one-tenth (7.3 percent) were institutionalized pending the outcome of aftercare supervision revocation hearings, and two (0.2 percent) were admitted on federal commitments. The 53 boys and 7 girls admitted pending the completion of revocation hearings and federal commitments are excluded from the statistics in Tables 2 through 18 since admission and demographic related data are not reported. (See Table 1.)

- Eight out of 10 (80.2 percent) of the boys admitted during calendar year 1987 were committed from Milwaukee (363 cases), Racine (44 cases), Dane (38 cases), Kenosha (28 cases), Brown (18 cases), Marathon (17 cases), Outagamie (17 cases), Eau Claire (10 cases), Manitowoc (10 cases), and Winnebago (10 cases) counties. Two counties, Milwaukee with 27 commitments and Rock with 7, accounted for one-half (54.8 percent) of all the girls who entered Lincoln Hills School during calendar year 1987. (See Table 2.)

- The average (mean) age for boys admitted was 15.9 years with those received at Ethan Allen being somewhat older, 16.0 years, than those at Lincoln Hills where the average (mean) age was 15.7 years. Girls institutionalized during 1987 had an average (mean) age of 15.8 years. (See Table 3.)

- Three out of 10 youths, (boys 29.0 percent and girls 30.6 percent) were born outside Wisconsin. The remainder of the admissions, with the exception of 11 boys and one girl born in foreign countries and two boys for whom information about place of birth was unavailable, were born in Wisconsin. (See Table 4.)

- Youths from White racial and/or ethnic backgrounds accounted for more than two-fifths (43.6 percent) of the admissions during calendar year 1987. (See Table 5.)

- Unarmed burglary (22.4 percent), theft (15.3 percent), auto theft (12.7 percent), and battery (12.3 percent) were the major delinquent acts most often committed prior to admission by boys. Girls were most often involved in theft (22.6 percent), auto theft (14.5 percent), battery (9.7 percent), and resisting arrest (9.7 percent) prior to admission. One-third (32.3 percent) of the boys received at Lincoln Hills had been involved in unarmed burglary as compared with less than one-fifth (16.4 percent) of those admitted to Ethan Allen where more boys tended to have been involved in armed or unarmed robbery (13.9 percent) and some form of assault or battery (14.3 percent.) (See Table 6.)

- Three-fifths (61.2 percent) of the boys and girls (59.7 percent) admitted during 1987 were assessed as having difficulties with assaultive behavior, either singly or in combination with sexual behavior, alcohol and/or drug usage, or other types of problems. Assessments also indicated that three-fifths (57.1 percent) of the boys and two-thirds (64.5 percent) of the girls were involved in the misuse of alcohol and/or other drugs either alone or in conjunction with other types of difficulties. Sexual misbehavior, alone or in combination with other problems, was found to be a factor for just over one-tenth (11.6 percent) of the boys and two-fifths (40.3 percent) of the girls. These percentages were obtained by totaling all categories which included assault to arrive at a total of cases in which assaultiveness was a difficulty. (See Table 7.)

- Under one-fourth (22.8 percent) of the boys and 3 out of 10 girls (30.6 percent) were returned from aftercare following revocation of field supervision. Eight out of 10 juveniles who fall in this category had been revoked because of rule violations. (See Table 8.)

- One-tenth (10.0 percent) of the boys and one-third (32.3 percent) of the girls had been adjudicated as delinquent for the first time. Over two-fifths (42.1 percent) of the boys admitted to Ethan Allen had a record of five or more prior adjudications of delinquency. Over one-third (35.0 percent) of the boys at Lincoln Hills had one previous delinquency adjudication. (See Table 9.)

- One-fourth (26.2 percent) of the boys and about two-fifths (38.7 percent) of the girls had previously been confined in a correctional facility for juvenile offenders. (See Table 10.)

- Two-thirds (64.5 percent) of the boys and just under two-fifths (38.7 percent of the girls had a record of prior supervision by counties rather than state agencies. (See Table 11.)

Seven out of 10 boys (71.7 percent) and three out of 10 girls (29.1 percent) came from living situations in which at least one parent or step-parent was present. Almost one-half (45.4 percent) of the boys at Lincoln Hills came to the institution from foster homes, group homes, or child caring institutions as contrasted with Ethan Allen where eight out of 10 (86.3 percent) of the boys came from homes in which at least one parent or step-parent was present. (See Table 12.)

- Seven out of 10 (72.4 percent) of the boys and about two-thirds (64.5 percent) of the girls were found to be without any physical, emotional, or developmental disabilities. (See Table 13.)

- About two-fifths (42.2 percent) of the boys and one-third (33.9 percent) of the girls had completed an eighth grade or less than an eighth grade education prior to admission. (See Table 14.)

- A tested grade level of ninth grade or greater was reported for two-fifths (41.3 percent) of the boys and one-fifth (21.1 percent) of the girls. (See Table 15.)
- One-half of the boys (50.0 percent) and girls (49.9 percent) were reported to be functioning at normal or above normal intelligence levels. Two-

thirds of the boys admitted to Ethan Allen (65.7 percent) were found to be functioning at less than normal intelligence levels as contrasted with Lincoln Hills where eight out of 10 (80.0 percent) were reported as being at or above normal. (See Table 16.)

- General custody was found to be a suitable classification for eight out of 10 (83.4 percent) of the boys and over one-half (54.8 percent) of the girls. All but one (98.4 percent) of the boys admitted to Ethan Allen were considered candidates for general custody as contrasted with just under three-fifths (58.5 percent) of those admitted to Lincoln Hills. (See Table 17.)

- Based upon county of commitment two-thirds (65.9 percent) of the boys and over one-half (54.8 percent) of the girls were potential candidates for aftercare supervision by the state rather than by counties. (See Table 18.)

Offenders Released From
Wisconsin Adult Correctional Institutions
Calendar Year 1987

HIGHLIGHTS

- A total of 2,604 offenders were released from Wisconsin's correctional institutions for adults during calendar year 1987. Seven out of 10 (72.2 percent) were classified as first releases, approximately one-fourth (23.9 percent) as rereleases, and the remainder (3.9 percent) were offenders released after completion of revocation hearings or alternative to revocation placements, or for other reasons. (See Table 1)

- The majority, 89.9 percent of the males and 92.5 percent of the females were released to a community supervised status; i.e., parole, mandatory release, or special action early release. (See Table 2)

- Males released during 1987 were often serving sentences for unarmed burglary (27.1 percent), armed robbery (8.4 percent), and theft (7.8 percent), while females were frequently incarcerated for forgery (21.8 percent), theft (20.5 percent), and other drug offense (9.0 percent). (See Table 3)

- Just under one-half (48.4 percent) of the males and slightly more than three-fifths (63.4 percent) of the females released during 1987 were serving sentences of three years or less. The average (mean sentence for the total group was 60.2 months with males and females serving average sentences of 61.2 and 44.5 months respectively. These computations do not include six males with life sentences. (See Table 4)

- Almost two-fifths (37.7 percent) of the males were committed to the institutions from courts in Milwaukee County as were approximately three out of 10 (28.8 percent) of the females. Approximately one-third (32.0 percent) of the females and roughly one-fourth (24.1 percent) of the males were committed from Dane, Kenosha, Racine, and Rock Counties. (See Table 5)

- The average (mean) length of stay since most recent admission was 22.8 months for males and 16.8 months for females with an average (mean) for all releases during 1987 of 22.4 months. (See Table 6)

- Males rereleased during 1987 spent, since last new admission, an average (mean) of 55.1 months in the institution; females, an average (mean) of 41.9 months. Rereleases as a group spent an average (mean) of 54.6 months. (See Table 7)

- One-fourth (24.8 percent) of the males and females (25.0 percent) rereleased during 1987 had at least two prior releases to community supervision. (See Table 8)

- Just under three-fifths (55.2 percent) of the males and two-fifths (41.0 percent) of the females released during 1987 were White. (See Table 9)

- One-half (52.0 percent) of the males and three-fifths (62.8 percent) of the females released during 1987 were classified as property offenders. Over one-fourth (26.6 percent) of the males were classified solely as assaultive offenders while less than one-tenth (8.9 percent) were categorized solely as drug offenders. About one-fifth (20.5 percent) of the females were categorized solely as assaultive offenders while one-tenth (10.3 percent) were classified solely as drug offenders. (See Table 10)

- Less than one-tenth (5.1 percent) of the males and only three (1.9 percent) of the females released during 1987 were turned over to authorities from other jurisdictions on detainer status. (See Table 11)

- Somewhat less than one-fifth (16.7 percent) of the males, as contrasted with almost two-fifths (37.9 percent) of the females, took part in adult basic education courses while institutionalized. (See Table 13)

- Less than one-fifth (17.9 percent) of the males and just over one-fourth (26.3 percent) of the females released during 1987 participated in GED or HED courses prior to release.

- Three-fourths of the males (74.8 percent) and females (77.6 percent) did not take part in high school classes while confined. High school diplomas were earned by 22 males and 8 females prior to release. (See Table 14)

- Participation in institution programs designed to assist offenders in dealing with problems stemming from the use of both alcohol and other drugs was noted for slightly more than one-tenth (12.8 percent) of the males and one-fourth (25.6 percent) of the females released during 1987. (See Table 15)

- Less than one-fifth of the males (17.0 percent) and females (16.0 percent) took part in some type of work release program while incarcerated. (See Table 16)

- Forty-five males (1.9 percent) and 19 females (2.6 percent) released during 1987 participated in study release. (See Table 17)

- Almost one-fourth (23.0 percent) of the males and somewhat less than one-fifth (16.0 percent) of the females took part in some type of vocational or apprenticeship program prior to release. (See Table 18)

- Eighty-seven males (3.7 percent) and 11 females (7.1 percent) participated in some type of college study program during their stay in the institution. (See Table 19)

- Males serving sentences for unarmed burglary, armed robbery, and theft, which were the crimes most often committed by males first-released in 1987, spent an average (mean) of 22.1, 45.6, and 16.7 months respectively in the institution. Females released after commitment for forgery, theft, and other drug violations, the offenses most frequently reported for females first-released in 1987, spent an average (mean) of 17.5, 14.0, and 11.2 months in the institution. (See Table 20)

- Males serving sentences for the most common offenses among those rereleased in 1987 (unarmed burglary, armed robbery, and theft) served an average (mean) of 15.6, 31.3, and 14.0 months between the time of reinstitutionalization and rerelease. Females rereleased in 1987 who were serving sentences for forgery and theft, the crimes for which rereleased females had most often been sentenced, spent an average (mean) of 15.8 and 9.3 months in the institution. (See Table 21)

- First-released males who were serving five-year sentences were institutionalized for an average (mean) of 29.9 months prior to release while female first-releases with five-year sentences spent an average (mean) of 24.2 months in the institution. (See Table 22)

- Males and females with five-year sentences who were released from the institution and returned following revocation of some type of field supervision spent an average of 12.6 and 10.5 months in the institution prior to being rereleased during 1987. (See Table 23)

- Nine out of 10 (87.6 percent) of the males and females released during 1987 planned to live somewhere within the State of Wisconsin. With the exception of two males the remainder (12.4 percent) of the releases intended to live elsewhere in the United States. (See Table 24)

Juveniles Released from
Division of Corrections Juvenile Institutions
Calendar Year 1986

The purpose of this publication is to present the reader with some basic information about the 799 youths, 728 boys and 71 girls, who were released from Wisconsin's correctional institutions for juvenile offenders during calendar year 1986. These figures include juveniles reported in Table 1, Type of Release, as releases to some type of community-based aftercare supervision, those who were discharged directly from the institutions upon completion of the terms of commitment or upon attaining the age of majority, the boy who died while institutionalized, and those who were discharged by order of a juvenile court. The 72 boys and 5 girls reported in Table 1 as releases following completion of some type of aftercare supervision revocation hearing and the boy and girl who were being supervised for jurisdictions other than Wisconsin have been excluded from any further consideration in this bulletin. Tables 2 through 16 contain social and demographic information about children released during 1986 as well as information relating to their participation in institution programs prior to release.

Juvenile Males

Ethan Allen and Lincoln Hills Schools reported a total of 728 releases during calendar year 1986; an increase of 9.0 percent over 1985 when a total of 668 boys left the institutions. Boys who left the institutions for aftercare placements in the community under state, county, or TRY program supervision made up the bulk (79.3 percent) of the 1986 releases. Somewhat less than one-fifth (14.6 percent) received direct discharges upon the attainment of the age of majority or the expiration of term of commitment, less than one-tenth (6.1 percent) were discharged from the institutions by order of the juvenile court, and one boy died while in residence. The average (mean) length of stay at both Ethan Allen and Lincoln Hills Schools prior to release in 1986 was found to be 8.6 months.

The majority (95.0 percent) of the boys who left Ethan Allen School During 1986 intended to live somewhere within Wisconsin. The remainder, with the exception of 19 boys for whom such information was unavailable, planned to live elsewhere in the United States. Since Ethan Allen School is the designated reception center for the southern one-third of the state it is not surprising that the bulk (92.1 percent) of the boys released from that institution should intend to return to that area. In turn, the majority (69.4 percent) of those released from Lincoln Hills intended to take up residence in the northern two-thirds of Wisconsin. Just over three-fourths (76.9 percent) of the boys released from Lincoln Hills as compared with just under two-fifths (38.9 percent) from Ethan Allen were from White or White-Hispanic family backgrounds. This contrast can probably be attributed to the fact that the bulk of Wisconsin's minority population is outside the area of the state that is primarily served by Lincoln Hills. Just under two-fifths (38.8 percent) of the boys who left Ethan Allen and one-third (33.5 percent) of those from Lincoln Hills were going to live with at least one parent or step-parent while placements in group foster homes were planned for over one-fifth (22.8 percent) of the boys released from Ethan Allen and over one-fourth (27.2 percent) of those who left Lincoln Hills. The average (mean) age for boys released from Ethan Allen was found to be 16.8 years while those who left Lincoln Hills were slightly younger with an average (mean) age of 16.5 years.

Three-fourths (75.0 percent) of the boys released from Ethan Allen and roughly nine-tenths (87.9 percent) of those released from Lincoln Hills took part in basic education courses while in the institutions. Almost two-fifths (38.0 percent) of the boys who left Ethan Allen and just over one-fourth (26.1 percent) of those released from Lincoln Hills had been enrolled in formal high school programs during their stay. Six boys, three from each institution, earned high school diplomas prior to being released. Slightly over one-third (35.0 percent) of the boys were enrolled in GED or HED classes while in the institutions with over three-fifths (63.5 percent) of the enrollees successfully earning GED or HED certificates. Participation in some type of vocational, technical, or adult educational program was noted for about one-third (34.9 percent) of the boys from Ethan Allen and just under one-fourth (23.2 percent) of those from Lincoln Hills. Participation in institution programs designed to assist boys in dealing with problems relating to the use of alcohol and/or other drugs was noted for 7 out of 10 (69.5 percent) of boys who left Lincoln Hills and just under one-half (48.2 percent) of those released from Ethan Allen.

Juvenile Girls

Lincoln Hills School reported the release of 71 girls during calendar year 1986; an increase (7.6 percent) over the previous year when 66 girls left the institution. Over four-fifths (84.5 percent) were released to the community under the terms of state, county, or TRY program aftercare supervision, about one-tenth (9.9 percent) received direct discharges, and the remainder (5.6 percent) were discharged by order of a juvenile court. Girls released during 1986 had been institutionalized for an average (mean) of 7.0 months and a median of 6.5 months prior to leaving the institution.

All of the girls released during 1986, with the exception of two who intended to reside elsewhere in the United States, left the institution to take up residence somewhere in Wisconsin. Somewhat over three-fifths (62.3 percent) of the girls who planned to live in Wisconsin were going to placements in five counties: Dane (13 Cases), Brown (9 cases), Milwaukee (8 cases), Racine (7 cases), and Kenosha (6 cases). All of these counties with the exception of Brown County, which is located in the north-eastern section of the state, are located in the southern one-third of Wisconsin. Just over one-fourth (26.7 percent) of the girls were going to live with family members; i. e., parents, step-parents, or other relatives while just under one-half (49.3 percent) were leaving the institution for some type of foster home or child-caring institution. About three-fifths (56.4 percent) of the girls, including one with a Hispanic heritage, were White, just over one-third (35.2 percent) were Black, and the remainder, including a Hispanic, were classified as Native Americans. The average (mean) and median ages respectively for girls released during 1986 were 16.3 and 16.8 years.

Seventy out of the 71 girls released from Lincoln Hills took part in basic education courses during their stays with 94.1 percent achieving a satisfactory standard of performance. Attendance at formal high school classes was noted for 7 out of 10 (71.8 percent) of the girls while one-fourth (25.4 percent) participated in GED or HED programs. Although no girls released during 1986 earned a high school diploma while institutionalized, ten girls (14.1 percent) did earn GED or HED certificates. More than one-half (56.3 percent) of the girls took the opportunity to participate prior to release in programs designed to assist them in dealing with problems related to the use of alcohol and/or other drugs.

Division of Corrections Juvenile Institutions
Calendar Year 1987

- Wisconsin's correctional institutions for juvenile offenders reported the release of 779 youths during calendar year 1987; 455 boys (58.4 percent) from Ethan Allen School and 261 boys (33.5 percent) and 63 girls (8.1 percent) from Lincoln Hills School. Seven out of 10 boys (72.2 percent) and girls (73.0 percent) were given first or rereleases to aftercare supervision, over one-tenth (14.9 percent) of the boys and less than one-tenth (4.8 percent) of the girls were released upon completion of the terms of commitment, and less than one-tenth (4.7 percent) of the boys and about one-tenth (11.1 percent) of the girls were discharged by order of the juvenile court. Boys and girls released after the completion of aftercare supervision revocation hearings accounted for 7.9 and 11.1 percent of the year's releases while one boy (0.1 percent) was released after being supervised as a federal commitment. The 57 boys and 7 girls reported in this table as release after completion of aftercare supervision revocation hearings as well as the one boy who was a federal case have been excluded from Tables 2 through 16 since demographic and social data are not available. (See Table 1.)

- Seven out of 10 boys (71.1 percent) released in 1987 planned to reside in Milwaukee (48.2 percent), Dane (6.1 percent), Racine (4.1 percent), Kenosha (3.3 percent), Marathon (3.3 percent), Rock (3.0 percent), or Winnebago (3.0 percent) counties. Two-thirds (67.7 percent) of the girls leaving Lincoln Hills in 1987 were slated for placements in Milwaukee (19.6 percent), Brown (19.6 percent), Dane (14.3 percent), Kenosha (7.1 percent), or Rock (7.1 percent) counties. All youths (96.9 percent) released in 1987, with the exception of 15 boys and 7 girls for whom no information was available, left the institutions for a residence in Wisconsin. (See Table 2.)

- Boys had been institutionalized for an average (mean) of 8.2 months prior to release in 1987; girls, for an average (mean) of 7.1 months. The average (mean) length of stay for boys released from Ethan Allen (8.4 months) was somewhat longer than for those released from Lincoln Hills (7.9 months.) (See Table 3.)

- Boys released during 1987 were found to have an average (mean) age of 16.6 years, while girls had an average (mean) age of 16.5 years. Boys released from Ethan Allen were slightly older (16.7 years) than those released from Lincoln Hills where the average (mean) age was 16.4 years. (See Table 4.)

- Four out of 10 boys (42.7 percent) and 5 out of 10 girls (50.0 percent) released in 1987 were White. (See Table 5.)

- One-fifth (19.8 percent) of the boys and over one-third (35.8 percent) of the girls were referred to the SPRITE program while in the institutions. Referrals for services to Division of Corrections Clinical Services programs were made on one-third (34.6 percent) of the boys and almost one-fourth (23.3 percent) of the girls during their institutional stay. About one-fifth (18.8 percent) of the boys and less than one-tenth (5.4

percent) of the girls were referred for specialized educational services. Less than one-tenth (5.0 percent) of the boys and over one-tenth (14.3 percent) of the girls were referred to Department of Health and Social Services mental health agencies. These percentages were arrived at by totaling, for example, all categories in which Clinical Services was included. (See Table 6.)

- The SPRITE program accepted referrals and provided services to more than one-tenth (14.7 percent) of the boys and over one-third (35.8 percent) of the girls prior to their releases in 1987. Division of Corrections Clinical Services provided treatment for three-tenths (31.5 percent) of the boys and one-fourth (25.1 percent) of the girls prior to release while services for those with exceptional educational needs were provided prior to release for more than one-tenth (14.7 percent) of the boys and less than one-tenth (7.2 percent) of the girls. These percentages were derived in the same manner as in Table 6. (See Table 7.)

- About one-third (35.6 percent) of the boys and over one-half (55.3 percent) of the girls took part in a formal high school program during their institution stay. General Education Development (GED) certificates were earned by one-fifth of the boys (20.5 percent) and girls (19.6 percent) prior to release. (See Table 8.)

- Eight out of 10 (81.7 percent) of the boys and 7 out of 10 (71.5 percent) of the girls released in 1987 took part in some type of basic education program during their stay in the institutions. (See Table 9.)

- Participation in some type of vocational, technical, or adult education program while institutionalized was noted for over one-fourth (28.4 percent) of the boys and slightly over one-tenth (12.5 percent) of the girls released in 1987. (See Table 10.)

- Approximately two-fifths of the boys (38.8 percent) and girls (41.1 percent) were involved in some type of work program during their stay in the institution. (See Table 11.)

- Five out of 10 boys (50 percent) and one-fourth (35.7 percent) of the girls released during 1987 participated in alcohol and drug treatment programs during confinement. (See Table 12.)

- Residence in a foster home, group home, or child caring institution was the planned living arrangement for less than one-half (46.3 percent) of the boys and almost three-fifths (57.2 percent) of the girls released during 1987. (See Table 13.)

- Over one-half (55.2 percent) of the boys and two-thirds (67.9 percent) of the girls released during 1987 went to state-supervised aftercare. (See Table 14.)

- Unarmed burglary (23.6 percent), theft (15.8 percent), battery (12.9 percent), and auto theft (9.7 percent) were the major delinquent acts for which boys released during 1987 had been committed to the institution.

Girls released during 1987 had most frequently been committed for theft (21.4 percent), auto theft (16.1 percent), battery (8.9 percent), unarmed burglary (7.1 percent), or prostitution and commercial vice (7.1 percent). Boys released from Ethan Allen had more often been committed for robbery (15.7 percent) than those from Lincoln Hills where over one-third (35.7 percent) had originally been adjudicated delinquent because of burglary. (See Table 15.)

- One-half (51.7 percent) of the boys and less than two-fifths (37.5 percent) of the girls released during 1987 had been committed to the institutions from Milwaukee County. Five counties, Racine (32 cases), Dane (31 cases), Kenosha (27 cases), Rock (25 cases), and Outagamie (23 cases) had committed an additional two-fifths (21.0 percent) of the boys released during 1987. (See Table 16.)

Residents in Wisconsin
Juvenile Correctional Institutions
on June 30, 1988

- Wisconsin's correctional institutions for juvenile offenders reported a resident population of 511 youths on June 30, 1988; 303 boys at Ethan Allen School and 169 boys and 39 girls at Lincoln Hills School. Eight out of 10 (82.0 percent) were classified as new commitments, less than one-fifth (16.4 percent) as returns following revocation of aftercare supervision, and the remainder were institutionalized pending the outcome of aftercare supervision revocation hearings (1.2 percent) or were being supervised for the federal government (0.4 percent). (See Table 1)

- Boys and girls whose race and ethnic status was Black represented over two-fifths (45.0 percent) and those from White origins represented about 42.7 percent of the June 30, 1988, resident population. (See Table 2)

- Slightly more than one-half of the boys (51.1 percent) and girls (53.8 percent) in residence on June 30, 1988, were committed to the institutions from Milwaukee County.

  One-fifth (21.6 percent) of the boys were committed by Racine (28 cases), Dane (27 cases), Outagamie (19 cases), Kenosha (17 cases), and Rock (15 cases) Counties. (See Table 3)

- Unarmed burglary (19.3 percent), auto theft (16.5 percent), theft (14.8 percent), and battery (11.9 percent) were the delinquent acts for which boys were most often committed while girls were most often committed for battery (25.6 percent), theft (23.1 percent), unarmed burglary (10.3 percent), and resisting arrest (10.3 percent). (See Table 4)

- Three-fifths (60.8 percent) of the boys and two-thirds (66.6 percent) of the girls had problems with assaultiveness either alone or in conjunction with other types of problem behavior. Approximately two-fifths (42.0 percent) of the boys and over one-half (53.8 percent) of the girls were found to have difficulties with alcohol and/or other drugs either solely or in combination with assaultiveness, sexual behavior, or other problems. Percentages were derived by totaling all categories in which alcohol and/or other drug problems were included. (See Table 5)

- Boys and girls were found to have an average (mean) age of 16.2 years. Boys at Ethan Allen School, with an average (mean) age of 16.3 years, were somewhat older than those at Lincoln Hills, where the average (mean) age was 16.0 years. (See Table 6)

- Developmental and/or emotional disabilities were found to be a problem for two-fifths (42.4 percent) of the boys and just under one-half (48.7 percent) of the girls. Just over one-tenth (11.6 percent) of the boys at Ethan Allen School were found to have some type of physical disability while none were reported for Lincoln. (See Table 7)

- The eighth grade has been completed by approximately one-third of the boys (30.9 percent) and girls (35.9 percent); and one-third (32.8 percent) of the boys and over one-fourth (28.2 percent) of the girls had completed ninth grade. (See Table 8)

- One-third of the boys (34.7 percent) and over one-half (53.9 percent) of the girls were found, after testing, to be at or less than the seventh grade level. (See Table 9)

- Intelligence estimates indicated that five out of 10 boys (51.7 percent) and girls (51.3 percent) were at or above normal intelligence levels. One-third (32.1 percent) of the boys at Ethan Allen as compared with almost nine-tenths (87.0 percent) at Lincoln Hills were at normal or above normal intelligence levels. (See Table 10)

- Juveniles as a group were institutionalized for an average (mean) of 6.0 months since their most recent admission. The average (mean) stay for boys was 6.1 months while girls had spent an average (mean) of 5.1 months at Lincoln Hills. The average (mean) length of stay for boys was somewhat longer (6.3 months) at Lincoln Hills than at Ethan Allen (6.0 months). (See Table 11)

Fiscal Year Summary Report
# of Population Movement
1988

This publication is designed to provide an overall view of the volume and movement of offenders under the supervision of Wisconsin's Division of Corrections during the fiscal year ending on June 30, 1988. The Division of Corrections is responsible for both the operation of correctional facilities for adult and juvenile offenders as well as for the supervision of offenders residing in the community under probation, parole, mandatory release, special action early release, or juvenile aftercare supervision. The information contained in Tables 1 through 4 is a compilation of data originally published in the monthly report Statistical Bulletin C-59, Report of Wisconsin Corrections Population. Information about average daily populations and movement into and out of correctional institutions for adult offenders during fiscal year 1988 is presented in Table 1. This table also includes, in the columns labeled "contr. fac." information about offenders serving Wisconsin sentences under contractual arrangements in facilities operated by the federal government and in Wisconsin county jails. Information concerning offenders serving sentences at the Wisconsin Resource Center, an institution operated by the Division of Care and Treatment Facilities, is not included in Table 1.

Fiscal year movements and average daily population data for Ethan Allen and Lincoln Hills Schools, Wisconsin's facilities for juvenile offenders, are presented in Table 2 while information about the youth aids program appears in Table 2-A.

Table 3 displays information about the movements of offenders under field supervision in the community and data about absconders from field supervision is included in Table 4.

Average daily populations of offenders in correctional institutions or under supervision in the community during fiscal years 1984 through 1988 are presented in Table A. Data relating to absconders from field supervision are not included in this table.

Wisconsin's Division of Corrections was responsible for the supervision of 37,207 offenders on June 30, 1988; an increase of 3.7 percent over the 35,886 offenders under supervision on June 30, 1987. The population in residence in correctional institutions for adult offenders rose from 5,676 at the start to 5,790 at the end of fiscal year 1988; an increase of 2.0 percent. The resident population in juvenile institutions remained relatively the same with 515 residents at the start and 511 at the end of fiscal year 1988. Adults and juveniles reported in footnote a, Tables 1 and 2, as being absent with leave are not included in these population figures. Community supervision cases rose from 26,197 on July 1, 1987 to 27,013 on June 30, 1988; an increase of 3.1 percent. (See Table 3.) The number of community supervision cases on absconder status increased 11.3 percent from 3,498 at the beginning to 3,893 at the end of the fiscal year.

1988	32,420	26,115	22,333	21,740	3	-	590	3,782	3,385	-	167	230	6,305	5,781	524

* Average daily populations for the Wisconsin Resource Center, operated by the Division of Care and Treatment Facilities, have been excluded from this table. Average daily populations for WRC for fiscal years 1984 - 1988 were 78, 149, 160, 161, and 162.

The average daily population of offenders under Division of Corrections supervision during fiscal year 1988 was 32,420; an increase of 4.2 percent over the previous year's average daily population of 31,116 offenders. Fiscal year average daily populations have risen steadily from 27,724 in in 1984 to 32,420 in 1988; an overall increase of 16.9 percent during the five-year period. (See Table A.) Community supervision cases made up four-fifths, approximately 80.0 percent, of the average daily population throughout the five-year period.

During the fiscal years 1984-1988 the average daily population of offenders under some type of community supervision increased 15.5 percent from 22,608 cases in fiscal year 1984 to 26,115 cases in fiscal year 1988. The average daily population of offenders under probation supervision rose from 19,201 in 1984 to 22,333 in 1988; an increase of 16.3 percent. During that time period the average daily population of offenders under adult probation supervision increased 16.4 percent from 18,676 in 1984 to 21,740 in 1988. The overall average daily population of offenders under some type of parole supervision rose 11.0 percent from 3,407 in 1984 to 3,782 in fiscal year 1988. During 1988 the average daily population of adult offenders under some type of parole supervision was 3,385; a high for the five-year period and an increase of 2.7 percent over the 1987 average daily population of 3,295. The average daily population of juveniles under aftercare supervision dropped from the five-year high of 190 in 1986 to a low of 167 in 1988; a decrease of 12.1 percent. The decrease in the average daily population of youthful offenders is due to the repeal of the Youthful Offender Statute effective on July 1, 1978 while the almost total absence of juveniles under probation supervision is attributable to a Department of Health and Social Services policy decision to discontinue the provision of such services on a state level.

The average daily population of offenders in correctional institutions for adult and juvenile offenders rose steadily from 5,116 in 1984 to 6,305 in fiscal year 1988; an increase of 23.2 percent. The bulk of the increase was in institutions for adults where the average daily populations rose steadily from a low of 4,671 in fiscal year 1984 to a high of 5,781 during fiscal year 1988; an increase of 23.8 percent. Juvenile institution average daily populations were at a low of 445 in 1984, increased 20.0 percent to the five-year high of 534 in 1986, decreased 5.4 percent to 505 in 1987, and then increased 3.8 percent to 524 during fiscal year 1988.

Footnotes

Table 1. Facilities for Adults

/a Excludes 362 males: 6-psychiatric facilities; 3-medical hospitals; 37-court; 5-jail; 91-other jurisdictions; 161-Wisconsin Resource Center; 7-other temporary absence; 29-escapee, at large; 23-escapee, apprehended.

Excludes 13 females: 1-psychiatric facilities; 4-court; 1-other jurisdictions; 1-special security; 5-escapee, at large; 1-escapee, apprehended.

/b Excludes 60 status changes for males held pending revocation hearings; 2-new sentence, adult mandatory release violator; 2-no new sentence, adult probation violator; 14-no new sentence, adult parole violator; 35-no new sentence, adult mandatory release violator; 7-no new sentence, special action early release violator.

Excludes 2 status changes for females held pending revocation hearings: 1-no new sentence, adult probation violator; 1-no new sentence, adult mandatory release violator.

/c Excludes 444 status changes for males out on temporary absence: 7-first release, adult parole; 38-first release, adult mandatory release; 3-first release, special action early release; 2-first release, direct discharge; 10-first release, discharge court order; 1-first release, death; 9-rerelease, adult mandatory release; 4-rerelease, direct direct discharge; 2-rerelease, discharge court order; 2-release after completion of mandatory release revocation hearing; 1-release after completion of alternative to revocation contract; 202-transfer to maximum security facility; 37-transfer to medium security facility; 50-transfer to minimum security facility; 13-authorized absence; 63-unauthorized absence.

Excludes 38-status changes for females out on temporary absence: 1-first release, adult mandatory release; 24-transfer to maximum security facility; 1-transfer to minimum security facility; 1-authorized absence; 11-unauthorized absence.

Table 2. Juvenile Institutions

/a Excludes 32 juvenile males absent: 1-psychiatric facility; 2-furlough; 16-trial foster home; 1-other jurisdiction; 10-over-stayed leave; 2-escapee, at large.

Excludes 3 juvenile females absent: 1-trial foster home; 1-over-stayed leave; 1-escapee, at large.

/b Excludes 148 status changes for juvenile males held pending revocation hearings: 129-return from state aftercare; 11-return from TRY program; 1-return from county aftercare; 7-return from WMHI program.

Excludes 16 status changes for juvenile females held pending revocation hearings: 12-return from state aftercare; 4-return from TRY program.

/c Excludes 438-status changes for juvenile males out on temporary absence: 179-first release, state aftercare; 2-first release, TRY program; 77-first release,county aftercare; 11-first release, direct discharge; 10-first release, discharge court order; 52-rerelease, state aftercare; 7-rerelease, county aftercare; 7-rerelease, direct discharge; 1-rerelease, discharge court order; 5-release after completion of state aftercare supervision revocation hearing; 1-release after supervision for jurisdiction other than Wisconsin; 9-transfer to juvenile institution; 24-authorized absence; 52-over-stayed leave; 1-unauthorized absence.

Excludes 54 status changes for juvenile females out on temporary absence: 15-first release, state aftercare; 4-first release, county aftercare; 2-first release, direct discharge; 3-first release, discharge court order; 3-rerelease, state aftercare; 2-rerelease, county aftercare; 3-rerelease, direct discharge; 2-rerelease,discharge court order; 2-authorized absence; 16-over-stayed leave; 2-unauthorized absence.

Footnotes
(Concluded)

DCI-REC - Dodge Correctional Institution, Reception Center
DCI-PROP - Dodge Correctional Institution, Institution Proper
WCI - Waupun Correctional Institution
GBCI - Green Bay Correctional Institution
CCI - Columbia Correctional Institution, opened May 14, 1986
FLCI - Fox Lake Correctional Institution
KMCI - Kettle Moraine Correctional Institution
OSCI - Oshkosh Correctional Institution, opened September 10, 1986
OCI - Oakhill Correctional Institution
WCCS-North - Wisconsin Correctional Center System-Northern Sector. Created effective July 1, 1985, WCCS-North includes (1) Gordon, Black River, McNaughton, Sanger B. Powers, Winnebago, and Flambeau Centers from the Wisconsin Correctional Camp System, (2) St. Croix Center, previously a part of the Bureau of Community Corrections, and (3) the Drug Abuse Center, formerly the Corrections Drug and Alcohol Treatment Center.
WCCS-South - Wisconsin Correctional Center System-Southern Sector. Created effective July 1, 1985, includes Oregon and Thompson, both formerly units of the Wisconsin Correctional Camp System, and the Marshall E. Sherrer, Abode, St. John's and Women's Centers, all previously units within the Bureau of Community Corrections. Baker House was also included in the Southern Sector from July 1,1985 to December 26, 1985. Minimum Security Bunkhouse became part of WCCS-South on July 1, 1987.
Contract Facilities- Includes Minnesota correctional institutions (Stillwater, St.Cloud, and Oak Park Heights), Milwaukee County House of Corrections, Wisconsin county jails, Ferris Center (Dane County Huber Law Facility), and federal institutions in which Wisconsin inmates are housed under contract.
TCI - Taycheedah Correctional Institution

Security Level - Maximum security facilities include DCI, WCI, GBCI, CCI, and TCI. Medium security facilities include FLCI, KMCI, and OSCI. Minimum security facilities include OCI and North and South WCCS.
EAS Ethan Allen School
LHS - Lincoln Hills School
WMHI - Winnebago Mental Health Institute
W/O - Without
Prob. - Probation
Par. - Parole
M. R. - Mandatory Release
Y. O. - Youthful Offender

Residents in Wisconsin
Adult Correctional Facilities
on June 30, 1988

HIGHLIGHTS

- Eight out of 10 males (80.2 percent) and 9 out of 10 females (90.9 percent) in residence on June 30, 1988, were classified as new admissions. New admissions include offenders received with new sentences, probation violators with or without a new sentence, and juvenile aftercare violators sentenced as new adult offender. (See Table 1, pps.1-3, 29-30)

- More than one-half (54.5 percent) of the adult male resident population were White while over a third (37.1 percent) were Black. Over two-fifths (45.8 percent) of the females in residence were classified as White while nearly the same were Black (44.7 percent). (See Table 2, p.4, p.31)

- The major offenses most often reported for males in residence were unarmed burglary (22.7 percent), armed robbery (10.3 percent), and first degree sexual assault (8.2 percent). Females were found to have most often been sentenced for forgery (15.3 percent), theft (14.5 percent), and other drug violations (8.8 percent). (See Table 3, pps.5-7, pps.32-33)

- Over one-half (55.5 percent) of the males in residence were classified as assaultive or assaultive sex offenders while than two-fifths (43.1 percent) of the females in residence were classified as assaultive or assaultive sex offenders. (See Table 4, p.8, p.34)

- Males in residence were serving an average (mean) sentence of 10.5 years; females, an average (mean) sentence of 6.9 years. Offenders serving life sentences were excluded from these considerations. (See Table 5, p.9, p.35)

- Commitments from Milwaukee County accounted for about two-fifths of the males (38.1 percent) and females (41.2 percent) in residence. One-fourth (24.4 percent) of the males were committed from Dane, Kenosha, Racine, and Rock Counties as were one-third (34.6 percent) of the females with the addition of Winnebago County. (See Table 6, pps.10-14, pps.36-38)

- The average (mean) age for males was 30.4 years; for females, 32.2 years. (See Table 7, p.15, p.39)

- Over one-half (55.1 percent) of the males and somewhat less than one-half (45.0 percent) of the females were born in Wisconsin. (See Table 8, p.16, p.40)

- Four-fifths (79.8 percent) of the males and about three-fourths (73.3 percent) of the females were found to be without physical, emotional, or developmental disabilities. (See Table 9, p.17, p.41)

- A record of military service was noted for approximately one-fifth (18.1 percent) of the males. Eight (3.1 percent) women were reported with military experience. (See Table 10, p.18, p.42)

- High School Diplomas or GED or HED certificates were held by over two-fifths (45.4 percent) of the males and three-tenths (29.4 percent) of the females. Almost one-fifth (19.8 percent) of the females as contrasted with less than one-tenth (8.5 percent) of the males had a record of some college training. (See Table 11, p.19, p.43)

- One-fifth (20.0 percent) of the males and one-fourth (24.4 percent) of the females were found to have a tested grade level of twelfth grade or more. (See Table 12, p.20, p.44)

- The average (mean) institution stay for males in residence on June 30, 1988, was 26.5 months; for females, 20.9 months. Four out of 10 males (39.6 percent) and females (45.4 percent) had been institutionalized for less than one year. (See Table 13, p.21, p.45)

- Three out of 10 (34.1 percent) of the males in residence were classified as maximum or close security, almost two-fifths (37.0 percent) were classified as medium or medium out and about one-fourth (24.4 percent) were classified as minimum. The female population was divided into thirds; 28.2 maximum, 32.1 medium or medium out and 32.4 percent minimum. (Note: The presence of individuals with maximum or medium security classifications in minimum security institutions is due to a time lag in reporting changes to the information system.) (See Table 14, p.22, p.46)

- A moderate or serious need for treatment relating to problems with the use of alcohol was noted for almost three-fifths (57.6 percent) of the males and one-fifth (21.2 percent) of the females in residence. Information was obtained from the inmate needs assessment system. (See Table 15, p.23, p.47)

- Over one-half (56.6 percent) of the males and almost two-thirds (62.6 percent) of the females were found to be in at least moderate need of treatment for problems relating to the use of drugs. Information was obtained from the inmate needs assessment system. (See Table 16, p.24, p.48)

- Three-fourths of the males (78.0 percent) and females (75.6 percent) were found to be in need of treatment for problems involving the use of alcohol and/or other drugs. Information was obtained from the inmate needs assessment system. (See Table 17, p.25, p.49)

- Records indicated that one-fifth (20.2 percent) of the males and one-third (32.1 percent) of the females were in need of some type of treatment for problems relating to mental health. Information was obtained from the inmate needs assessment system. (See Table 18, p.26, p.50)

- Five out of 10 males (52.4 percent) and 6 out of 10 females (62.6 percent) were found to be in need of at least moderate participation in some type of educational programming. Information was taken from the inmate needs assessment system. (See Table 19, p.27, p.51)

- Eight out of 10 males (79.3 percent) and females (80.5 percent) were found to have at least a moderate need for some type of vocational training. Information was taken from the inmate needs assessment system. (See Table 20, p.28, p.52)

Calendar Year Summary Report
# of Population Movement
1988

Wisconsin's Division of Corrections is responsible for the operation of correctional institutions for adult and juvenile offenders and for the supervision of offenders residing in the community under probation, parole, mandatory release, special action early release, and juvenile aftercare supervision. This publication, which is a compilation of data originally published on a monthly basis in Statistical Bulletin C-59, Report of Wisconsin Corrections Population, provides the reader with summary information about the volume and movements of offenders under Division of Corrections supervision during calendar year 1988.

Information about average daily populations and movement into and out of correctional institutions for adult offenders is presented in Table 1. Offenders serving Wisconsin sentences under contractual arrangements in facilities operated by the federal government or in Wisconsin county jails are included in this table in the columns labeled "contr.fac". Table 1 does not include offenders serving their sentences at the Wisconsin Resource Center, an institution operated by the Division of Care and Treatment Facilities. Calendar year movement and average daily population information for Ethan Allen and Lincoln Hills Schools, Wisconsin's institutions for juvenile offenders, may be found in Table 2 while data about the youth aids program appears in Table 2-A. Data about the movements of offenders under field supervision in the community is included in Table 3 and data relating to absconders from field supervision during calendar year 1988 can be found in Table 4. Average daily populations of of community supervision and institution cases for calendar years 1984-1988 can be found in Table A.

A total of 37,849 offenders were under the supervision of Wisconsin's Division of Corrections on December 31, 1988; an increase of 3.0 percent over the 36,732 offenders under supervision on January 1, 1988. Adult institutions resident populations increased 3.6 percent from 5,805 at the beginning to 6,014 at the end of the calendar year. The number of residents in institutions for juvenile offenders decreased slightly (1.9 percent) from 540 at the start to 530 at the end of 1988. Adults and juveniles reported in footnote a, Tables 1 and 2, as being absent with leave are not included in these population counts. The number of offenders under supervision in the community increased 1.7 percent from 26,576 on January 1 to 27,033 on December 31, 1988 while the number of community supervision cases placed on absconder status increased 12.1 percent from 3,811 to 4,272 during the same time period.

* Average daily populations for the Wisconsin Resource Center, operated by the Division of Care and Treatment Facilities, have been excluded from this table. Average daily populations for WRC for calendar years 1984 - 1988 were 113, 157, 162, 162, and 159.

During calendar year 1988 the average daily population of offenders under Division of Corrections supervision was 32,754; an increase of 2.7 percent over the previous year when an average daily population of 31,893 was reported. Calendar year average daily populations have risen steadily from 28,442 in 1984 to 32,754 in 1988; an overall increase during the five-year period of 15.2 percent. (See Table A.) Throughout the five-year period community supervision cases made up four-fifths,approximately 80.0 percent of the average daily population of offenders under supervision.

The average daily population of offenders under some type of community supervision increased 13.4 percent from 23,280 in 1984 to 26,389 in calendar year 1988. Probation supervision average daily populations rose from 19,755 in 1984 to 22,548 in 1988; an increase of 14.1 percent while that of offenders under some type of parole supervision remained relatively stable between 1984 and 1985 but increased 9.2 percent from 3,516 in 1985 to 3,841 in 1988. The average daily population of adult offenders under parole supervision increased 4.7 percent from 3,302 in 1987 to a five-year high of 3,456 in calendar year 1988. Juvenile aftercare average daily populations, which stood at a five-year high of 190 in calendar year 1986 decreased 14.2 percent to 163 in calendar year 1988. The almost total lack of youthful offender and juvenile probation populations is due to (1) the repeal of the Youthful Statute effective on July 1, 1978 and (2) Department of Health and Social Services policy decision to discontinue provision of juvenile probation services on the state level.

Correctional institution average daily populations rose steadily from 5,162 in 1984 to 6,365 in 1988; an increase of 23.3 percent. The increase was largely confined to facilities for adult offenders where average daily populations increased 24.9 percent from 4,683 in 1984 to 5,849 in 1988. Juvenile institution average daily populations, which were at a low of 479 in calendar year 1984, increased 10.9 percent to a high of 531 in 1985, decreased (3.8 percent) to 511 in 1986, and have remained relatively stable since that time, standing at 516 in calendar year 1988.

* Division of Corrections cases in residence at the Wisconsin Resource Center (rated bed capacity-160) are not included in Table 1. WRC population on January 1, 1988 was 163 and the population on December 31, 1988 was 160. WRC calendar year 1988 average daily populations including and excluding medical hospital were 159; the average daily population including beds held was 160.

Table 1. Facilities for Adults

/a Excludes 340 males: 4-psychiatric facilities; 2-medical hospitals; 19-court; 7-jail; 81-other jurisdictions; 160-Wisconsin Resource Center; 7-other temporary absence; 34-escapee, at large; 26-escapee, apprehended.

Excludes 16 females: 4-court; 1-jail; 3-other jurisdictions; 7-escapee, at large; 1-escapee, apprehended.

/b Excludes 52 status changes for males held pending revocation hearings; 3-new sentence, adult mandatory release violator; 3-no new sentence, adult provation violator; 6-no new sentence, adult parole violator; 36-no new sentence, adult mandatory release violator; 4-no new sentence, special action early release violator.

Excludes 3 status changes for females held pending revocation hearings: 2-no new sentence, adult mandatory release violator; 1-no new sentence, special action early release violator.

/c Excludes 432 status changes for males out on temporary absence: 5-first release, adult parole; 36-first release, adult mandatory release; 3-first release, special action early release; 1-first release, direct discharge; 12-first release, discharge court order; 1-first release, death; 5-rerelease, adult mandatory release; 3-rerelease, direct discharge; 2-rerelease, discharge court order; 1-release after alternative to revocation contract; 195-transfer to maximum security facility; 51-transfer to medium security facility; 46-transfer to minimum security facility; 1-transfer to contract facility; 10-authorized absence; 60-unauthorized absence.

Excludes 37 status changes for females out on temporary absence: 2-first release, adult parole; 1-first release, adult mandatory release; 27-transfer to maximum security facility; 1-authorized absence; 6-unauthorized absence.

Table 2. Juvenile Institutions

/a Excludes 22 juvenile males absent: 11-trial foster home; 1-jail; 3-other jurisdiction; 7-over-stayed leave.

Excludes 4 juvenile females absent: 1-trial foster home; 3-overstayed leave.

/b Excludes 154 status changes for juvenile males held pending revocation hearings: 136-return from state aftercare; 15-return from TRY program; 3-return from WMHIP program.

Excludes 15- status changes for juvenile females held pending revocation hearings: 12-return from state aftercare; 3-return from TRY program.

c Excludes 453-status changes for juvenile males out on temporary absence: 165-first release, state aftercare; 1-first release,TRY program; 92-first release, county aftercare; 1-first release, WMHIP program; 7-first release, direct discharge; 10-first release, discharge court order; 54-rerelease, state aftercare; 4-rerelease, county aftercare; 9-rerelease, direct discharge; 3-rerelease, discharge court order; 7-release after completion of state aftercare reovcation hearing; 11-transfer to juvenile correctional institution; 1-release of federal commitment; 29-authorized absence; 59-over-stayed leave.

Excludes 62 status changes for juvenile females out on temporary absence: 14-first release, state aftercare; 1-first release, TRY program; 7-first release, county aftercare; 2-first release, direct discharge; 4-first release, discharge court order; 7-rerelease, state aftercare; 2-rerelease, county aftercare; 1-rerelease, direct discharge; 1-rerelease, discharge court order; 4-authorized absence; 17-over-stayed leave; 2-unauthorized absence.

Footnotes
(Concluded)

DCI-REC	Dodge Correctional Institution, Reception Center
DCI-PROP	Dodge Correctional Institution, Institution Proper
WCI	Waupun Correctional Institution
GBCI	Green Bay Correctional Institution
CCI	Columbia Correctional Institution, opened May 14, 1986
FLCI	Fox Lake Correctional Institution
KMCI	Kettle Moraine Correctional Institution
OSCI	Oshkosh Correctional Institution, opened September 10, 1986
OCI	Oakhill Correctional Institution
WCCS-North	Wisconsin Correctional Center System-Northern Sector. Created effective July 1, 1985, WCCS-North includes (1) Gordon, Black River, McNaughton, Sanger B. Powers, Winnebago, and Flambeau Centers from the Wisconsin Correctional Camp System, (2) St. Croix Center, previously a part of the Bureau of Community Corrections, and (3) the Drug Abuse Center, formerly the Corrections Drug and Alcohol Treatment Center.
WCCS-South	Wisconsin Correctional Center System-Southern Sector. Created effective July 1, 1985, includes Oregon and Thompson, both formerly units of the Wisconsin Correctional Camp System, and the Marshall E. Sherrer, Abode, St. John's and Women's Centers, all previously units within the Bureau of Community Corrections. Baker House was also included in the Southern Sector from July 1,1985 to December 26, 1985. Minimum Security Bunkhouse became part of WCCS-South on July 1, 1987.
Contract Facilities	Includes Minnesota correctional institutions (Stillwater, St.Cloud, and Oak Park Heights), Milwaukee County House of Corrections, Wisconsin county jails, Ferris Center (Dane County Huber Law Facility), and federal institutions in which Wisconsin inmates are housed under contract.
TCI	Taycheedah Correctional Institution
Security Level	Maximum security facilities include DCI, WCI, GBCI, CCI, and TCI. Medium security facilities include FLCI, KMCI, and OSCI. Minimum security facilities include OCI and North and South WCCS.

Juveniles Admitted to
Division of Corrections Juvenile Institutions
Calendar Year 1988

- Wisconsin's correctional institutions for juvenile offenders reported the admission of 767 youth, 711 boys and 56 girls, during calendar year 1988. The majority of the boys (68.6 percent) and girls (64.3 percent) were classified as new commitments, one-fifth (22.8 percent) of the boys and three-tenths (30.3 percent) of the girls had been reinstitutionalized following the revocation of aftercare field supervision, and the remainder (8.5 percent of the boys, 5.4 percent of the girls) were sent to the institution to await the outcome of aftercare supervision revocation hearings. (See Table 1.)

- Over one-half (54.9 percent) of the boys were committed to the institutions from Milwaukee County with an additional fifth (21.6 percent) being sent to the institutions from Dane, Kenosha, Outagamie, Racine, and Rock Counties. Three counties, Milwaukee (37.7 percent), Racine (13.2 percent), and Rock (9.4 percent) committed three-fifths (60.3 percent) of the girls received during 1988. (See Table 2.)

- The average (mean) age for boys and girls was 15.9 years. Boys admitted to Ethan Allen were slightly older (16.0 years) than those received at Lincoln Hills where the average (mean) age for boys was 15.8 years. (See Table 3.)

- Seven out of 10 boys (71.5 percent) and girls (69.8 percent) were born in Wisconsin. One-fourth (26.9 percent) of the boys and three-tenths (30.2 percent) of the girls were born elsewhere in the United States, four boys (0.5 percent) were born in foreign countries, and the information about place of birth was unavailable for 7 boys (1.1 percent). (See Table 4.)

- Approximately two-fifths (42.9 percent) of the boys and just under one-half (47.2 percent) of the girls were from White racial and ethnic backgrounds. (See Table 5.)

- The major delinquent acts committed by boys just prior to admission were auto theft (19.8 percent), unarmed burglary (18.4 percent), theft (15.6 percent), and battery (12.4 percent). Girls were found to most often have been involved in theft (26.4 percent), battery (22.6 percent), unarmed burglary (11.3 percent), and criminal damage to property (7.5 percent) just prior to admission. Boys admitted to Lincoln Hills were more often involved in unarmed burglary (29.5 percent) than those received at Ethan Allen (13.0 percent) while boys admitted to Ethan Allen were more frequently involved in some type of robbery (10.1 percent) than those at Lincoln Hills (2.8 percent). (See Table 6.)

- Assessments completed during the reception process found that one-half (50.6 percent) of the boys and just under three-fifths (56.7 percent) of the girls had problems with assaultive behavior either alone or in conjunction with other types of problem behaviors. One-third (32.4 percent) of the boys and somewhat less than three-fifths (56.7 percent) of the girls were found to be in need of assistance with problems relating to the use of alcohol and/or other drugs either singly or in combination with other problem behaviors. Problems with sexual behavior either by itself or along with other problems were noted for one-tenth (11.3 percent) of the boys and three-tenths (30.3 percent) of the girls admitted during 1988. These percentages were derived by totaling, for example, all categories which included assaultiveness to arrive at the percentage of cases in which assaultive behavior was found to be an area of concern. (See Table 7.)

- One-fourth (24.7 percent) of the boys and three-tenths (30.2 percent) of the girls admitted during 1988 were returned to the institution from aftercare status following the revocation of field supervision. Nine out of 10 (93.2 percent) of the juveniles who fell into this category had been revoked because of rule violations. (See Table 8.)
- Admission during 1988 was the first adjudication of delinquency for less than one-tenth of the boys (5.7 percent) and girls (7.5 percent) received at the institutions. One-third (33.8 percent) of the boys and just under two-fifths (37.7 percent) of the girls were found to have a record of at least five prior adjudications of delinquency. The proportion of boys with at least five prior adjudications was higher among admissions to Ethan Allen (47.4 percent) than Lincoln Hills (6.1 percent). (See Table 9.)
- Three out of 10 boys (30.8 percent) and one-third (34.0 percent) of the girls had a previous record of confinement in a juvenile correctional facility. (See Table 10.)
- Over one-half (56.2 percent) of the boys and almost two-thirds (64.2 percent) of the girls had previously been under supervision by county as apposed to state agencies. (See Table 11.)
- Seven out of 10 (70.1 percent) of the boys as contrasted with four out of 10 (43.4 percent) of the girls came to the institutions from homes in which at least one parent or step-parent was also residing. Nine-tenths (89.5 percent) of the boys at Ethan Allen came to the institution from homes in which at least one parent or step-parent was present as contrasted with Lincoln Hills where almost three-fifths (57.0 percent) of the boys entered the institution from placements in foster homes, group homes, or child caring institutions. (See Table 12.)
- Eight out of 10 boys (79.1 percent) and three-fourths (75.5 percent) of the girls were found, after completion of the assessment and evaluation process, to be free from physical, developmental, or emotional disabilities. (See Table 13.)
- Over two-fifths of the boys (42.7 percent) and girls (45.3 percent) had completed the eighth grade or had less than an eighth grade education. (See Table 14.)
- Test scores indicate that one-half (49.6 percent) of the boys as contrasted with almost two-thirds (64.1 percent) of the girls were achieving at or less than the eighth grade level. (See Table 15.)
- One-half (51.9 percent) of the boys and over three-fifths (62.3 percent) of the girls were functioning at normal or above normal intelligence levels. Over three-fifths (62.9 percent) of the boys at Ethan Allen as contrasted

with over one-tenth (13.1 percent) of those at Lincoln Hills were reported to be functioning at less than normal intelligence levels. (See Table 16.)

- Eight out of 10 boys (82.2 percent) and seven out of 10 girls (71.7 percent) were considered in need of general custody. All but two (99.5 percent) of the boys received at Ethan Allen were categorized as in need of general custody; a classification found suitable for less than one-half (46.5 percent) of the boys admitted to Lincoln Hills. (See Table 17.)

- Seven-tenths (71.7 percent) of the boys and over one-half (54.7 percent) of the girls were, based upon county of commitment, potential candidates for state, as opposed to county, aftercare supervision. (See Table 18.)

Offenders Admitted to
Wisconsin Adult Correctional Institutions
Calendar Year 1988

HIGHLIGHTS

- The majority of the males (70.1 percent) and females (80.4 percent) admitted to Wisconsin's correctional facilities for adult offenders during calendar year 1988 were classified as new admissions. This category includes offenders who were not under any type of supervision at the time of sentencing as well as those who violated the terms of probation and were incarcerated with or without additional sentences. (See Table 1.)

- Unarmed burglary (23.9 percent), theft (7.8 percent), and other drug violations (7.0 percent) were the offenses for which males were most frequently sentenced. Females were most often sentenced for forgery (22.4 percent), theft (17.8 percent), and other drug violations (10.9 percent). (See Table 2.)

- The average (mean) length of sentence for all offenders admitted during 1988 was 72.4 months. Males were sentenced to an average (mean) of 73.1 months; females to 51.9 months. Twenty-eight males and one female admitted to serve life sentences were excluded from these computations. (See Table 3.)

- One-third of the males (33.2 percent) and females (33.3 percent) were committed from Milwaukee County. Commitments from Racine, Kenosha, Dane, and Rock Counties accounted for just over one-fourth (26.2 percent) of the males and just under two-fifths (37.3 percent) of the female admissions. (See Table 4.)

- The average (mean) length of sentence received by males convicted of unarmed burglary, theft, and other drug violations were 63.2 months, 45.8 months, and 43.3 months. Females sentenced for forgery, theft, and other drug violations were given average (mean) sentences of 53.2, 39.0, and 36.1 months. (See Table 5.)

- Males classified solely as assaultive offenders made up one-fourth (25.9 percent) of the admissions; an additional one-tenth (13.8 percent) were also categorized as sex offenders while 1.2 percent were also classified as drug offenders. One-fifth (20.7 percent) of the females were considered to be assaultive offenders. Males and females regarded solely as drug offenders made up one-tenth (10.2 percent) of the total 1988 admissions. (See Table 6.)

- Almost one-fifth (17.2 percent) of the males were under the age of 21 at the time of admission as were less than one-tenth (7.4 percent) of the females. The average (mean) age for all offenders was 28.0 years, which was also the average (mean) age for males. Females, with an average (mean) age of 29.0 years, were somewhat older. (See Table 7.)

- Almost three-fifths (55.9 percent) of the males and one-half (50.0 percent) of the females were from White racial and ethnic backgrounds. (See Table 8.)

- Six out of 10 males (62.8 percent) and five out of 10 females (48.9 percent) were found to have never been married. (See Table 9.)

- One-half (49.7 percent) of the males and somewhat less than three-fifths (56.3 percent) of the females had no record of felony convictions other than that associated with this admission. A record of at least two prior felony convictions was noted for just under three-tenths (27.0 percent) of the males and almost one-fourth (23.5 percent) of the females. (See Table 10.)

- Over one-half (52.2 percent) of the males and two-thirds (65.5 percent) of the females had no prior record of confinement in a penal institution. Prior incarceration in a Wisconsin penal institution was noted for over one-third (35.2 percent) of the males and over one-fourth (28.7 percent) of the females. (See Table 11.)

- Over one-fourth (26.8 percent) of the males had a record of prior stay in a juvenile institution. This was also true for slightly more than one-tenth (13.2 percent) of the females. (See Table 12.)

- Two-fifths of the males (40.4 percent) and females (41.4 percent) had not earned high school diplomas prior to admission. However, GED or HED certificates had already been earned by one-third (32.2 percent) of the males and one-fifth (20.1 percent) of the females. (See Table 13.)

- One-fourth (24.3 percent) of the males and over one-third (35.1 percent) of the females were found, after testing, to rank at least at the twelfth grade level. (See Table 14.)

- Eight out of 10 males (77.5 percent) and six out of 10 females (59.8 percent) were found to be without physical, developmental, or emotional disabilities. Less than one-tenth (7.5 percent) of the males as contrasted with just under one-fourth (23.6 percent) of the females were reported to have developmental and/or emotional disabilities. (See Table 15.)

- Less than one-fifth (17.3 percent) of the males and four females (2.3 percent) were reported to have a record of military service. (See Table 16.)

- Upon completion of security assignment procedures over one-half (54.6 percent) of the males and over two-fifths (43.1 percent) of the females received an initial custody classification of medium or medium-out. (See Table 17.)

- After completion of the assessment and evaluation process almost one-half (47.0 percent) of the males were placed in maximum security facilities, almost three-tenths (28.8 percent) in medium security facilities, and one-fifth (19.1 percent) in minimum security facilities. Seven tenths (71.3 percent) of the females were initially placed in maximum - medium security facilities while one-fourth (25.8 percent) were placed in minimum security settings. (See Table 18.)

- Slightly less than two-fifths (37.9 percent) of the males and one-fourth (24.7 percent) of the females were found to be in serious need of treatment for problems relating to the use of alcohol. (See Table 19.)
- Three out of 10 males (30.7 percent) and four out of 10 females (40.2 percent) were seriously in need of treatment for problems caused by drug usage. (See Table 20.)
- One-fifth of the males (18.3 percent) and females (19.5 percent) were found to be without a need for treatment relating to the use of alcohol and/or other drugs. (See Table 21.)
- A need for involvement in some type of education programming was noted for over one-half of the males (53.4 percent) and females (55.1 percent) admitted during 1988. (See Table 22.)
- One-fourth (26.7 percent) of the males and one-third (32.8 percent) of the females were found to be in serious need of some type of vocational training. (See Table 23.)
- Assessment and evaluation procedures indicated that about one-fifth of the males (17.9 percent) and females (20.1 percent) had at least a moderate need for treatment of some type of problem relating to mental or emotional health. (See Table 24.)
- Participation in drug and/or alcohol (82.7 percent), therapy (51.3 percent), or education (42.3 percent) programs was recommended for males admitted in 1988. Further evaluation was recommended for 6.2 percent of the males. It was recommended that one-half (49.4 percent) of the females become involved in some type of therapy program, two-fifths (39.1 percent) in drug and/or alcohol programs, and one-third (34.4 percent) in education programs. Further evaluation of two-fifths (38.5 percent) of the females was recommended. (See Table 25.)
